Senior Mobile Engineer (iOS · Android) who ships with AI agents

Senior iOS engineer with 7+ years of iOS production delivery and 10+ years of software engineering experience. Build native mobile features in Swift, integrate backend APIs, and own testing and release workflows. Recent work on my AI meeting-intelligence platform includes a SwiftUI companion app with audio recording, broadcast capture, device-flow authentication, and resumable uploads. Review and test AI-generated code with hands-on responsibility for architecture and production releases.

Core Technologies

Swift, SwiftUI, UIKit, AVFoundation, ReplayKit, AVKit, Swift Concurrency, async/await, actors, URLSession, Keychain, App Intents, ARKit, SceneKit, WidgetKit, HealthKit, REST APIs, Xcode, TestFlight, App Store Connect, CI/CD

Experience

Independent (self-employed)

Senior Software Developer · Remote · Oct 2024 - Present

AI meeting-intelligence platform (my product)

Decision memory for teams: the meetings and work a team chooses to share become searchable decisions, actions and risks, each linked back to the conversation it came from.

- Built the platform's iOS companion app with Swift, SwiftUI, AVFoundation microphone recording, ReplayKit broadcast capture, and AVKit playback; implemented async/await, actor-isolated resumable uploads, persisted manifests, device-flow authentication, Keychain storage, App Intents, and unit tests.
- Designed and built the platform end to end with a small team and Claude Code agents, connecting native capture to Python/FastAPI services, queued transcription, and evidence-linked decisions, actions, and risks. Review, test, and approve AI-generated code and every production release.
- Built a Manifest V3 JavaScript Chrome recording extension and recovery workflows for interrupted recordings. As of Oct 2026, the platform has processed ~1,580 meetings (~390 hours of recorded audio).

Software development firm

Senior Native Mobile Developer (Remote)

Oct 2024 - Present

- Built and maintained native and cross-platform mobile features across iOS and Android, including Swift native modules, Kotlin implementation work, Flutter features, and modern Android UI development.
- Worked on Android modernization through migration from legacy XML layouts to Jetpack Compose, applying ViewModel/MVVM patterns for maintainable state and UI behavior.
- Added WidgetKit extension targets and shared code schemes to expose app state to iOS widgets and improve native iOS user experiences outside the main app.

App Dev for All

Senior Android Developer · Full-time · Remote

Mar 2025 - Oct 2026

Code on the Go: an open-source Android IDE that runs on the phone itself, offline, for learners worldwide.

- Second most active of 56 contributors: 288 merged pull requests across plugin architecture, AI features, critical bug fixes and performance, all public on GitHub.
- Designed a modular AI Core plugin that routes across on-device GGUF models (llama.cpp), Google Gemini and OpenAI, with MCP tooling, inline code suggestions, vector search and speech-to-text.
- Took over the on-device Sketch to UI computer-vision module (YOLOv8) and shipped it as a dedicated plugin that turns a hand-drawn sketch into an Android layout.

Online art marketplace with AR

Senior iOS Developer (Remote, Part-time)

Feb 2023 - Jan 2026

- Developed and maintained production iOS features in Swift for an online art marketplace's mobile app, including augmented reality art visualization and catalog-facing user experiences.
- Built and improved AR features using ARKit and SceneKit, with attention to rendering behavior, interaction quality, performance, and user experience.
- Managed Beta and Production build generation, TestFlight delivery, App Store publication workflows, and release coordination with QA and project stakeholders.

Contract engagement

Senior Mobile Developer (contract) — Web3 wallet app

Aug 2025 - Jan 2026

- Developed the token swaps flow and Android features for the Web3 wallet app using Jetpack Compose, Hilt, and the repository pattern.
- Implemented chat reply and reaction features, fiat on-ramp UI, and Kotlin DSL migration through sprint work with the client's teams.

Software consultancy

Senior Native Mobile Developer (Remote)

Feb 2019 - Oct 2024

Health app (Mar 2024 - Oct 2024)

- Built mobile app features with native iOS modules in Swift and Android-facing integrations, including HealthKit, deep links, push notifications, background delivery, and offline-aware serialization.
- Used Firebase, Sentry, and PostHog for analytics, observability, continuous updates, and production visibility across mobile releases.

Security-focused mobile app (Dec 2023 - Mar 2024)

- Developed secure native mobile applications using Swift and Kotlin, focused on protected user workflows, fraud-aware flows, and reliable mobile/backend communication.
- Integrated secure REST APIs and AWS-backed services with native mobile modules to support asynchronous workflows, data integrity, and responsive user experiences.

High-volume restaurant ordering app (Dec 2020 - Dec 2023)

- Led Android and iOS mobile initiatives to optimize app performance, improve UX, and coordinate scalable backend-connected data flows supporting high-volume consumer usage.
- Built and maintained Android features using Kotlin and modern native architecture patterns while collaborating with backend teams on analytics, personalization, secure data access, and transaction processing.

Banking and trust-services apps (Mar 2019 - Dec 2020)

- Delivered secure mobile features for financial products across Android and iOS, with Kotlin/Java Android work, iOS support, automated testing, secure transactions, and backend-connected workflows.

Education center for blind and visually impaired students

Accessibility Engineer

2015 - Aug 2018

- Designed and developed an inclusive mobile learning platform for visually impaired users using Android Java/Kotlin, tactile feedback, audio narration, accessibility-first UX, and mobile device integration.

Education

Universidad Internacional del Ecuador

Master of Engineering, Cybersecurity

2024 - 2025

Universidad de las Fuerzas Armadas - ESPE

Engineer's Degree, Electronics, Automation and Control Engineering

2012 - 2018

Certifications

Associate Android Developer - Google for Developers; iOS Development: Architecture - LinkedIn; Programming in Objective-C - Coursera; Multiplatform Mobile App Development with Flutter - Coursera

Languages

English — Professional working proficiency (B2+); Spanish — Native.
